- STAY OFF COVER -- WILL NOT SUPPORT WEIGHT.
- KEEP CHILDREN AWAY. CHILDREN OR OBJECTS CANNOT BE SEEN UNDER COVER.
- REMOVE STANDING WATER -- CHILD CAN DROWN ON TOP OF COVER.
- REMOVE COVER(S) COMPLETELY BEFORE ENTRY OF BATHERS -- ENTRAPMENT POSSIBLE.
- NON-SECURED OR IMPROPERLY SECURED COVERS ARE A HAZARD.
- FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN INJURY OR DROWNING.
- THIS IS NOT A SAFETY COVER.
- DO NOT REMOVE THIS LABEL.

COVERTECH INDUSTRIES LIMITED  
MADE IN CANADA

Do not remove the warning label from the cover. Covertech Fabricating Inc. will not be held responsible for any winter covers which are cut and found to be void of warranty or out of the warranty expiration date or be liable for any incidental damages resulting from any defects in material or workmanship.

The following are specifically excluded from this warranty (loops pulling out, excessive abrasion, damage caused by unpadded coping, ordinary wear and tear, damage caused by animals scratching or chewing the cover while in use or in storage). Any abrasion of the coating is normal during use and does not constitute a defect in material. The cover will continue to keep your pool free from dirt and debris. Covertech Fabricating Inc. will not be liable for any incidental damage resulting from any defects in material or workmanship.

# WINTER COVER

## INSTRUCTIONS FOR USE AND INSTALLATION

### GENERAL PREPARATIONS

1. Since the cover is designed to rest on the pool's water, ensure the pool is not leaking.
2. Follow the pool manufacturer's winterizing instructions.
3. The pool must be chlorinated until freeze-up to prevent algae growth.
4. Pad sharp corners, rough edges or protrusions to protect your new cover.
5. Lower the water level in the pool below the skimmer (18" below coping).
6. Lay the cover on the ground with the black side down.
7. It is important that covers be installed properly and snugly to prevent flopping in high winds which will cause damage to cover.

### ABOVE GROUND POOL INSTALLATION

1. Thread the cable through the loops until the ends of the cable meet.
  2. Pull cable as tight as you can using your hands.
  3. Insert on cable end through the other hole in the winch and into the center spindle.  
Insert the other cable end through the other hole in the winch and pull both ends of the cable as far as it will go. Turn the winch handle to tighten the cable. Make sure the cable is tight against the pool wall to prevent wind from causing cover to flop.
  4. For deck pools, cut individual pieces and tie loops to the deck post.
- 

### IN-GROUND POOL INSTALLATION

1. Secure the cover by placing unfilled water bags on the outside perimeter of the cover.
2. The water bags must cover the entire perimeter of the cover.
3. Proceed in filling the water bags only half-filled allowing for ice expansion in freezing temperature.
